

PROFESSIONAL SUMMARY

Detail-oriented Information Technology student with strong foundations in software development, database management, and computer networking. Experienced in building full-stack web applications and developing interactive dashboards using HTML, CSS, JavaScript, Python, React, Node.js, and MySQL. Skilled in designing REST APIs, debugging, and problem-solving, with a solid understanding of Software Development Life Cycle (SDLC) and Agile methodology. Seeking an entry-level software developer opportunity to apply technical skills, contribute to impactful projects, and grow in a collaborative environment.

EXPERIENCE

Jr Full Stack Developer Intern | NextZen Digital

February 2026 – May 2026

- Worked with the development team as an intern, gaining hands-on experience across both front-end and back-end technologies.
- Delivered consistent, professional contributions throughout the internship, earning recognition for dedication and willingness to learn.
- Collaborated with the team on software development tasks, applying and strengthening core web development skills.

Web Designing Intern | Tech Access Pvt Ltd

January 2023 – April 2023

- Designed user-friendly UI components, improving user engagement by ~25% and strengthening front-end user experience.
- Improved front-end performance, reducing page load time by ~20% through code and asset optimization.
- Improved website usability and navigation through responsive layout enhancements and UI refinements.
- Collaborated with team members to ensure cross-browser compatibility and consistent front-end behaviour.

(Soft skills integrated: collaboration, communication, problem-solving)

EDUCATION

- Bachelor of Technology in Information Technology | Sept 2023 – June 2026 | Guru Gobind Singh Indraprastha University
- Diploma in Information Technology | November 2020 – June 2023 | DSEU, Delhi
- CBSE, Class 10th | June 2020 | DMSSS, Delhi

PUBLICATIONS

- Research paper: Integration of Machine Learning with Financial Tracking Systems for Enhanced GST Compliance and Expense Management. Authored research focusing on the application of Machine Learning to improve financial transparency and tax compliance.

PROJECTS

GST Cash Ledger and Expense Prediction System

- Developed a full-stack web application using HTML, CSS, JavaScript.
- Automated GST calculations, reducing manual effort by ~40% and improving data processing efficiency.
- Built interactive dashboards using Chart.js for financial insights and data visualization.
- Implemented a Machine Learning (ML) model to predict expenses and GST liability.

AI-Based Rush Driving Detection System

- Implemented real-time video processing using OpenCV and NumPy for motion analysis.
- Applied Optical Flow for speed estimation and unsafe driving detection.
- Integrated SQLite database, Tkinter GUI, and Matplotlib for monitoring and visualization.
- Enhanced road safety insights through automated alerts and data logging.

EcoTrack – Carbon Footprint Tracker

- Built a full-stack carbon footprint tracker using Flask, SQLAlchemy, and SQLite to log and visualize daily CO2 emissions.
- Developed a daily calculator with live CO2 preview and Chart.js line/doughnut charts for 30-day trends.
- Designed personalized tips, a leaderboard, and a badge system based on user emission data to drive engagement.
- Implemented secure authentication using Werkzeug password hashing and Flask sessions.

Bikes4U – Online Rental System

- Built an online bike rental booking system using JavaScript and PHP with backend functionality.
- Integrated MySQL for real-time inventory tracking, booking management, and database operations.

CERTIFICATIONS

- NVIDIA – Certificate of Competency: Generative AI with Diffusion Models (July 2026)
- Google Cybersecurity Professional Certificate (Coursera, 9 courses) (August 2026)
- Oracle Certified Foundations Associate – Agentic AI Certified Foundations Associate (August 2026)
- Google Cloud – Introduction to Generative AI Studio (via Simplilearn SkillUp) (June 2025)
- Internshala – Data Structures and Algorithms
- HackerRank – SQL (Advanced), JavaScript (Intermediate), Python, Go (Basic), Java (Basic)
- Infosys SpringBoard – Cybersecurity and Applied Ethical Hacking

SKILLS SUMMARY

Programming Languages: Go, Python, C, C++, Java, JavaScript

Web Technologies: HTML, CSS, Bootstrap, React, Node.js, REST APIs

Frameworks & Tools: Gin, Git, Docker, Postman, Jupyter, Debugging, Unit Testing

Databases: MySQL, MongoDB, SQL (Advanced)

Computer Networking: OSI & TCP/IP Models, Subnetting & IP Addressing (IPv4/IPv6), DNS, DHCP, Routing & Switching, LAN/WAN Configuration, Network Protocols (HTTP/HTTPS, FTP, SSH, SMTP), Network Security & Firewalls, VPN Fundamentals

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Software Development Life Cycle (SDLC), Agile Methodology

IT Support and Systems: Operating Systems (Windows, Linux, macOS), System Administration, Hardware & Software Troubleshooting, IT Asset Management, Technical Support, Help Desk Operations, Active Directory, Remote Desktop Support, Backup & Recovery, Software Installation & Configuration, Peripheral Setup & Maintenance, IT Documentation & Ticketing Systems

Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability, Time Management, Leadership
